

BRAND GUIDELINES

POWER. MODERNITY. INNOVATION.

A visual identity system for smart sports accessories, state-of-the-art gym equipment, and technology-led performance products.

BRAND	NEO GEAR
AUDIENCE	Young adults & athletes • 18-35
POSITIONING	Futuristic • Dynamic • Performance-driven

BRAND DNA

The identity combines athletic intensity with a precise, technology-first visual language.

POWER	Strength, intensity, confidence, action.
MODERNITY	Minimal geometry, engineered details, premium contrast.
INNOVATION	Smart products, data, connected training, next-generation thinking.
FUTURISTIC	Angular forms, digital interfaces, high-tech visual cues.
DYNAMIC	Forward motion, speed, progression, continuous improvement.

Core brand statement

NEO GEAR is built for the next generation of athletes: smart gear engineered to make performance more measurable, more connected, and more powerful.

Visual language

Use strong black fields, restrained metallic neutrals, and controlled neon accents. Photography should feel high-contrast and kinetic; interface graphics should feel data-driven rather than decorative.

MAIN LOGO & CONCEPT

The NG monogram is constructed from the initials N + G and a forward-motion gesture.

ELEMENT	MEANING	ROLE
N	NEO / NEW / NEXT	Signals the next generation.
G	GEAR / GYM / GOAL	Connects the mark to equipment and achievement.
FORWARD MOTION	PROGRESS / SPEED / PERFORMANCE	Creates a directional, dynamic character.
NG MONOGRAM	FUTURISTIC / DYNAMIC / POWERFUL	Becomes the compact brand signature.

SUB-VERSIONS

Use the version that best fits the application while preserving the same proportions and visual hierarchy.

		
PRIMARY LOGO Default signature	NG MONOGRAM Compact applications	ONE-COLOR MONOGRAM Single-ink / reversed use

Application logic

PRIMARY	Website headers, packaging, campaigns, retail, official documents.
MONOGRAM	App icon, social avatar, equipment badge, apparel detail, favicon.
ONE-COLOR	Embroidery, engraving, monochrome printing, high-contrast reversed layouts.

OFFICIAL COLOR PALETTE

The palette balances energetic performance colors with durable, premium neutrals.

COLOR	HEX	CMYK	ROLE
NEO LIME	#A8FF00	33 / 0 / 100 / 0	Primary accent
ELECTRIC GREEN	#39FF14	65 / 0 / 100 / 0	Secondary accent
STEEL SILVER	#D9D9D9	0 / 0 / 0 / 20	Metallic neutral
GRAPHITE	#1A1A1A	0 / 0 / 0 / 90	Dark neutral
JET BLACK	#000000	0 / 0 / 0 / 100	Primary background
PURE WHITE	#FFFFFF	0 / 0 / 0 / 0	Light neutral

Color ratio

Use Jet Black / Graphite as the dominant field. Use Pure White and Steel Silver for information and hierarchy. Reserve NEO Lime and Electric Green for calls to action, performance cues, data highlights, and brand signatures.

OFFICIAL BRAND FONTS

The typography system pairs a futuristic display face with a neutral, highly legible interface font.

ROLE	FONT	WEIGHT	USE
Primary / Titles	Orbitron	Bold / 700	Main headings, campaign titles, high-impact statements.
Secondary / Body	Inter	Regular / 400	Body copy, descriptions, UI text.
Subtitles / Labels	Inter	SemiBold / 600	Specifications, navigation, product labels.
Emphasis	Orbitron	Medium / 500	Short technical highlights and statements.

Type hierarchy

H1	NEO GEAR / NEXT LEVEL PERFORMANCE
H2	SMART PERFORMANCE SYSTEM
BODY	Smart equipment engineered for the next generation of athletes.
LABEL	PERFORMANCE / TECHNOLOGY / POWER

Brand rule

Orbitron = FUTURE + TECHNOLOGY

Inter = CLARITY + PERFORMANCE

Recommended hierarchy: uppercase Orbitron for titles; Inter for all sustained reading and interface content; use tracking/letter spacing selectively on labels rather than body copy.

SAFE ZONE & MINIMUM SIZE

Clear space is mandatory. The logo must remain visually dominant and unobstructed.

RULE	STANDARD
Clear space	Minimum 1X on all four sides; 2X preferred for premium/signage applications.
Digital minimum	120 px minimum width for the full logo.
Print minimum	30 mm minimum width for the full logo.
Compact use	Use the NG monogram when the full lockup becomes too small to remain legible.

INCORRECT LOGO USAGE

Consistency is more important than fitting the logo into a layout. Adapt the layout—not the logo.

DO NOT STRETCH Never alter width/height proportions.	DO NOT ROTATE The mark always sits on its intended axis.
DO NOT RECOLOR Only approved brand colors and approved one-color versions.	DO NOT ADD EFFECTS No shadows, bevels, glows, outlines, or 3D effects.
DO NOT CROP Keep the entire mark visible and protected.	DO NOT BUSY-BACKGROUND Place the logo on a quiet, high-contrast field.
DO NOT REARRANGE Do not separate or reposition monogram and wordmark.	DO NOT CHANGE TYPE Never substitute or redraw the wordmark typography.

Background rule

Preferred fields are Jet Black, Graphite, dark photography, or clean light neutrals. Maintain strong contrast. On dark backgrounds, use the silver/white + NEO Lime version; on light backgrounds, use a dark/black + NEO Lime treatment.

PRACTICAL APPLICATIONS

The identity is designed to scale from physical equipment to connected digital experiences.

SPORTS T-SHIRT	Primary logo on chest; monogram as sleeve/detail mark. High contrast on black technical fabric.
SMART WATER BOTTLE	Vertical wordmark and monogram create a premium equipment signature. Lime acts as a functional accent.
MOBILE APP	Black interface, white hierarchy, lime data highlights and action controls. Typography follows Orbitron + Inter.
SOCIAL POSTS	Use large kinetic photography, concise statements, controlled lime graphics, and consistent logo placement.

SOCIAL MEDIA SYSTEM

Keep every channel recognizable through a consistent visual grammar rather than repeating identical layouts.

PLATFORM	ACCOUNT	VISUAL ROLE
Instagram	@neogear.eg	Hero photography, product launches, training culture, carousel education.
TikTok	@neogear_official	Fast motion, product demos, smart-gear features, athlete-first storytelling.
Facebook	/NeoGearEgypt	Product information, campaigns, community content, launches and announcements.

Content design rules

- Logo: keep within the 1X safe zone and use a consistent corner or header position.
- Accent: NEO Lime is an accent, not a background replacement; prioritize readability.
- Photography: athletic, high-contrast, directional, modern, with negative space for copy.
- Copy: short, assertive, performance-oriented. Avoid dense text on campaign artwork.
- CTA: use lime only for the most important action or measurable performance cue.

Suggested campaign language

BUILT FOR THE NEXT GENERATION.

TRACK. TRAIN. TRANSFORM.

HYDRATE SMARTER. PERFORM BETTER.

POWER IS A CHOICE.

BRAND SYSTEM AT A GLANCE

Use this page as the production checklist for designers, printers, developers, and social teams.

LOGO	Primary lockup + NG monogram + approved one-color versions.
SAFE ZONE	1X minimum; 2X preferred for premium applications.
MINIMUM SIZE	120 px digital / 30 mm print for full logo.
PRIMARY COLORS	NEO Lime #A8FF00 • Electric Green #39FF14.
NEUTRALS	Steel Silver #D9D9D9 • Graphite #1A1A1A • Jet Black #000000 • Pure White #FFFFFF.
TYPE	Orbitron 700 for titles • Inter 400/600 for body, labels and UI.
VOICE	Confident, concise, technical, performance-oriented.
SOCIAL	@neogear.eg • @neogear_official • /NeoGearEgypt
